Choose one useful specialist

A defined output makes role instructions easier to evaluate.

What the library supplies

Agency Agents contains specialist agent instructions for different work areas. The source reel demonstrates several roles and an orchestrator. The files guide an assistant; they are not a staffed agency or a guarantee that every task is completed correctly.

Start with one deliverable

For example, ask a proposal specialist to outline a project using facts you provide. Name the audience, scope, constraints and expected format. Keep invented clients, results and prices out of the brief.

Read the chosen role

Inspect its responsibilities, workflow and quality criteria before using it. Confirm which tools, data and connected services your assistant would need. Installing instructions does not connect those services automatically.

Keep a review point

Ask for a draft and a list of assumptions first. Check the facts and missing inputs before allowing later steps. A role label should help organize work rather than hide unanswered questions.

Coordinate without losing control

Use an orchestrator for a clear handoff between defined outputs.

Make dependencies explicit

List each work product, who reviews it and what the next role needs. A researched brief can feed a proposal; a reviewed specification can feed engineering. Keep the source facts attached across handoffs.

Separate drafts from actions

A drafted cold email is not permission to send it. Code generation is not deployment, and a financial worksheet is not an approved transaction. Define action-specific permissions before connecting outbound or production tools.

Check quality and actual usage

Review the deliverable against its acceptance criteria and record model or provider usage. The MIT instruction library is free software; the assistant, connected APIs and infrastructure can still have costs.

Save the smallest useful workflow

Keep the selected role files, revision, brief, output and review notes. Add another specialist only when it solves an observed need. This reel's AGENCY keyword points to this single-project guide.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word AGENCY refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
