Five tools for an inspectable workflow

Official sources. Practical steps.
Choose a task and make it repeatable.

YOUR FREE FIELD GUIDE

Understand the tools. Follow official setup.
Keep a small example you can verify.

Reel-25 / COMMENT CLAUDE / 09 NOV 2026

Start with a useful task

Follow the official sources for the tools shown in this reel.

Memory and discovery

Claude Mem keeps project context across work. Review what it records and where it stores it. Find Skills helps locate reusable instructions; inspect a skill’s contents and provenance before installing it.

Documents and setup

AnyDoc supports document workflows; read its supported formats and service requirements. Claude Code Setup recommends useful automations for a repository. Review the recommendations rather than enabling every hook automatically.

Engineering lifecycle

Addy Osmani’s Agent Skills covers a staged engineering workflow, from planning through verification. The source refers to twenty-four lifecycle skills; the current collection can include additional meta guidance.

Check the real result

Keep a repeatable example and review the actual output.

Add one tool at a time

Choose a small task and a baseline result. Install only the relevant integration through its official instructions, then verify the actual client can use it.

Keep project boundaries

Keep credentials and private customer material out of persistent context unless their storage is explicitly approved. A skill file is guidance, not permission to publish, spend or alter unrelated projects.

Review the outcome

Compare the actual change, tests and saved context with the original task. Preserve license notices when redistributing code, and check separate model or hosted-service terms.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word CLAUDE refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
