Role plugins

Adapt assistance to a real business task

Official sources. Practical steps.
Choose a task and make it repeatable.

YOUR FREE FIELD GUIDE

Understand the tools. Follow official setup.
Keep a small example you can verify.

Reel-31 / COMMENT PLUGIN / 09 NOV 2026

3rddesire.com/download

Start with a useful task

Follow the official sources for the tools shown in this reel.

Choose a role

The source shows Anthropic’s role-oriented plugins, including business workflows such as sales, marketing and finance. Check the current catalog and supported host before installation.

Define a bounded task

Supply one concrete question, the output format and authoritative reference material. Use synthetic or approved data until connector access is deliberately configured.

Read the plugin first

Review commands, skills, connectors and requested permissions. A role label does not guarantee expertise, current facts or access to your company systems.

Check the real result

Keep a repeatable example and review the actual output.

Verify the result

Trace important claims and calculations to the supplied sources. For specialist decisions, use appropriate professional review rather than treating an agent draft as final authority.

Keep actions deliberate

A plugin that can draft a message or plan does not automatically have permission to send, publish or transact.

Save a reusable brief

Keep the task, approved sources, plugin revision and corrections together. Add connectors only when their company and data scope are clear.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word PLUGIN refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
