REA

Trace an authorized application workflow

Official sources. Practical steps.
Choose a task and make it repeatable.

YOUR FREE FIELD GUIDE

Understand the tools. Follow official setup.
Keep a small example you can verify.

Reel-35 / COMMENT CODING / 09 NOV 2026

3rddesire.com/download

Start with a useful task

Follow the official sources for the tools shown in this reel.

Choose an allowed target

REA helps organize application reverse-engineering work. Use software, accounts and traffic you are authorized to inspect; do not treat access to a website as permission to bypass its restrictions.

Capture one workflow

Select a simple interaction and record inputs, visible behavior and relevant technical evidence. Exclude private sessions and unrelated customer data from shareable reports.

Identify the actual project

The source shows morluto/rea. Other example repositories visible in its demonstration are not automatically dependencies or tools required by this guide.

Check the real result

Keep a repeatable example and review the actual output.

Separate observation and inference

Mark what was directly observed and what remains a hypothesis. Reproduce the small workflow in a controlled environment before generalizing.

Review generated artifacts

Check file paths, dependencies and behavior of any output before execution. Keep the original capture and a known-good baseline.

Respect the boundaries

Licensing of REA code does not grant rights to copy another product’s assets, data or private APIs. Keep the evidence and permitted scope with the project.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word CODING refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
