Start with a useful task

Use the official tools discussed in this reel.

Choose the input mode

Read the official FL2VA and Ref2VA descriptions. Select text/first-last-frame input or multimodal references for your intended shot.

Plan resources before downloading

Check the current model files and hardware guidance. The reel’s8GB statement concerns optimized variants, not a guarantee that the full33B checkpoint fits any8GB card.

Review one short result

Start with a clear scene, action and audio prompt using material you may upload. Inspect the generated motion and synchronized speech manually.

Check the real result

Keep one repeatable example and inspect its actual output.

Check the model license

Use the current H3 Community License and acceptable-use terms; hosted services may have separate charges.

Keep reference permission

Use only authorized images, voices and source clips.

Validate claims yourself

A leaderboard position or source-demo claim is not a guarantee of quality, safety, censorship behavior or local performance.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word VIDEO refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
