Start with a useful task

Use the official tools discussed in this reel.

Select the product

Read the official skill catalog and pick the Google product relevant to your project rather than loading the whole collection.

Review prerequisites

Check each skill’s required tools, account and project configuration. Product access and API permissions remain separate from the skill text.

Test a narrow task

Use a test project and inspect the agent’s proposed change and actual output before production deployment or campaign edits.

Check the real result

Keep one repeatable example and inspect its actual output.

Pin the revision

The repository is under active development; record the version used.

Keep identities scoped

Use the intended Google account and cloud project.

Verify functionality

Having an instruction file does not establish a live API connection.

Official sources

Consult current upstream setup, licenses and service terms.

Google Agent Skills

Resource and access

The word GOOGLE refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 9 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
