Review Claude Code Setup recommendations

Choose useful extensions without installing a whole catalog blindly.

YOUR FREE FIELD GUIDE

Understand the tools. Follow official setup.
Keep a small example you can verify.

Reel-94 / COMMENT Plugin / 10 NOV 2026

Start with a useful task

Use the official tools discussed in this reel.

Identify the actual plugin

Open the official Claude Code Setup entry and read its current instructions. The source shows a codebase-aware recommendation workflow covering hooks, skills, subagents, plugins and MCP connections. Recommendations are suggestions rather than proof that each integration is ready.

Review one recommendation

Check why a tool applies to the project and which commands, services or permissions it needs. Separate a local configuration change from connecting an external account or enabling paid execution.

Apply and verify narrowly

Review the proposed diff and test the selected integration on the intended project. Preserve existing configuration and remove a suggestion that does not improve the actual task. This guide does not run installation.

Check the real result

Keep one repeatable example and inspect its actual output.

Check scope

A plugin cannot grant itself access to secrets, production data or paid tools. External connections retain their own approvals and account limits.

Check behavior

Confirm the hook or skill actually runs as expected and does not interfere with existing jobs. A recommendation count or quick setup claim is not a production acceptance test.

Keep version evidence

Record the directory entry and selected version. The source keyword is Plugin. Use official source links rather than similarly named third-party packages.

Official sources

Consult current upstream setup, licenses and service terms.

Resource and access

The word Plugin refers to this guide only on its matching reel. The free resource requires no follow, email address or purchase. The bio link for 3RD DESIRE products is separate.

Licenses and provider terms

Official sources checked on 10 November 2026. Read each project license and notices before modifying or redistributing software. Model, hosted-service and third-party media terms are separate; confirm their permitted uses and costs for your workflow.
